

IPS VideoManager V 4.0

Network Video Recorder (NVR)

IPS VideoManager Network Video Recorder (NVR) is an IP-based platform for basic, single server video surveillance systems. It supports 4 up to 32 cameras, two viewers and one client. The efficient architecture enables future extensions to a comprehensive video management system and the networking with an overall multi site management. Additionally, a broad range of video analytics and services is available.

Key features

- IP-based video management software
- Support of IP cameras and encoders
- IPS Motion and Sabotage Detection per camera
- Centralised data administration (SQL database)
- Display, operation and alarm management
- Simultaneous recording and playback
- Control of PTZ cameras and I/O devices
- Export to USB, Network, AVI

Applications

- Small, local video surveillance systems
- Replacement of DVRs and NVRs

Benefits

- IP technology
- Single or multi server systems
- Unlimited extensions to VMS/3D VMS
- Easy networking with MSM
- Optimum value for money

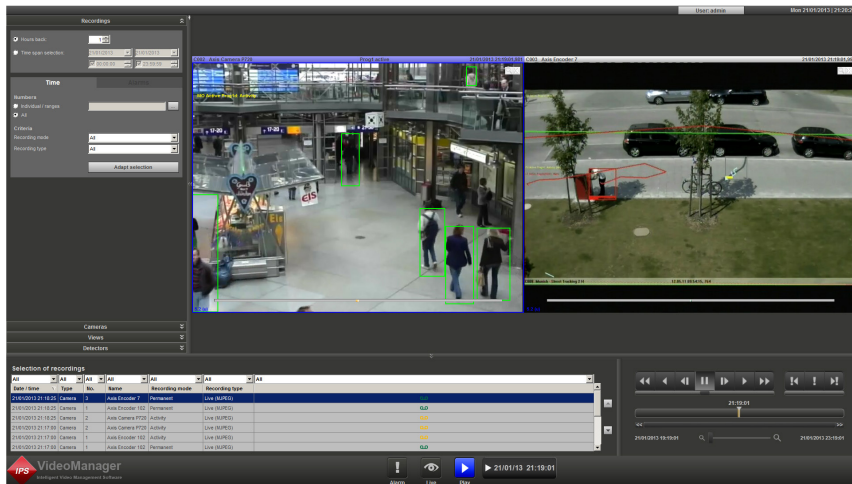

Intelligent Video Analytics

Above: Architecture for basic, single server video surveillance systems.

Right: Playback view for easy search and display of recordings.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.

Technical specifications	
Requirements hardware	<ul style="list-style-type: none"> • Hardware requirements according to www.ips-analytics.com
Requirements software	<ul style="list-style-type: none"> • Windows 7 SP1 (32/64 Bit) • Windows 8 Professional (64 Bit) • Windows Server 2008 R2 SP1 (64 Bit) • Windows Server 2012 (64 Bit)
System integration	<ul style="list-style-type: none"> • Continuous, unlimited scalability possible • Seamless integration of IPS VideoAnalytics with multi plugin architecture
Languages	<ul style="list-style-type: none"> • German, English, French, Italian, Spanish, Russian
Licences	<ul style="list-style-type: none"> • Information about VM licences at www.ips-analytics.com • Licensing with hardware dongle • Time-limited demo licences available
