Technical information ASDConfig

Dear Partner,

Kindly be informed that the following product changed effective on: 28.02.2023

Product name	Version old	Version new
ASDConfig	2.5.0	2.5.0.10

Additional Information / Description

The ASDConfig software 2.5.0 had some bugs which are corrected with the new Version 2.5.0.10

- Day-Night switch over UIM/SIM not possible
- Change of airflow and dust/dirt parameters were blocked
- Only program X01 was available

We recommend to install and use only the new version.
The new ASDConfig version is available on Partnerdata/Storebox.

We apologize for any inconvenience caused by this situation and thank you for your understanding and cooperation.

Should you have any questions concerning this matter, please do not hesitate to contact us.

Yours sincerely
